

Supervising Control Unit (FXSCU6)

The MasterMinder system is controlled and monitored by a Supervising Control Unit (SCU). The SCU monitors the system constantly without a computer. A computer is only required to program tests, analyse data, and add or delete luminaires.

The system is supplied with a complete Windows based software package and instructions allowing for easy operation of the system, including diagnostics, commissioning, additions, deletions and testing.

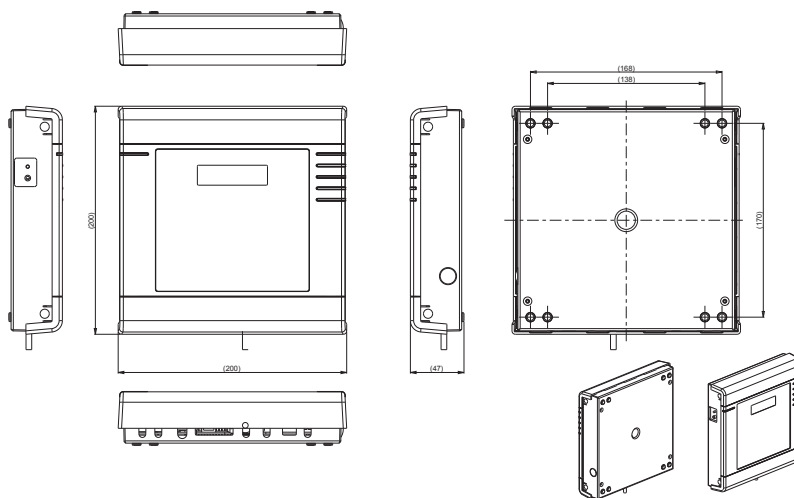

FEATURES

- USB port interface
- RS232 port interface
- Internal power supply
- LCD display
- Manage up to 4095 fittings on one SCU
- Manage up to 254 Intelligent Transponder Units (ITUs) on one SCU
