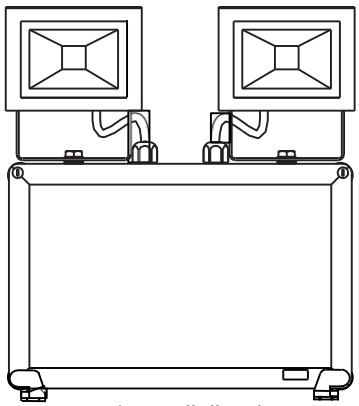
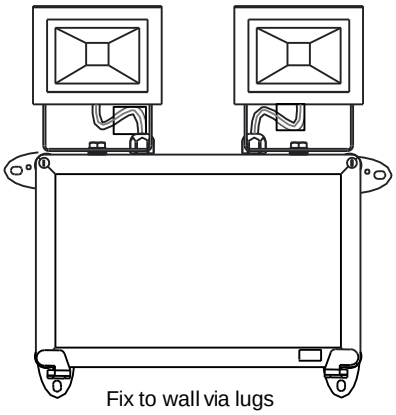
TWIN LED SITE GUARD



Fix to wall directly

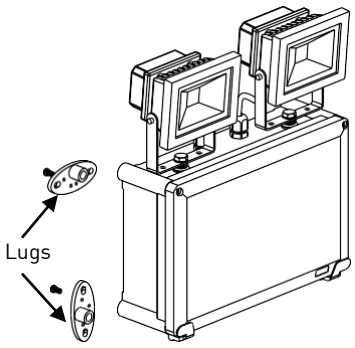


Fix to wall via lugs

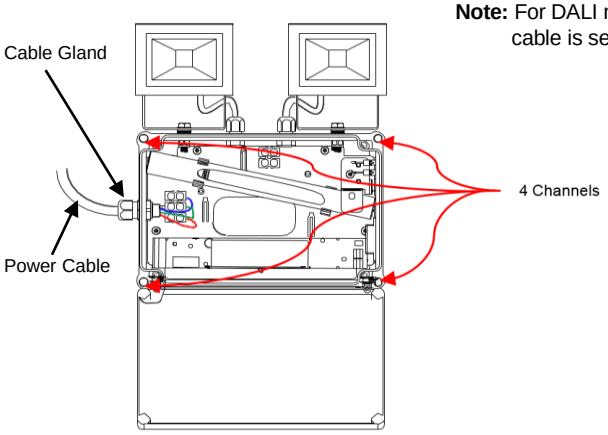
Specifications

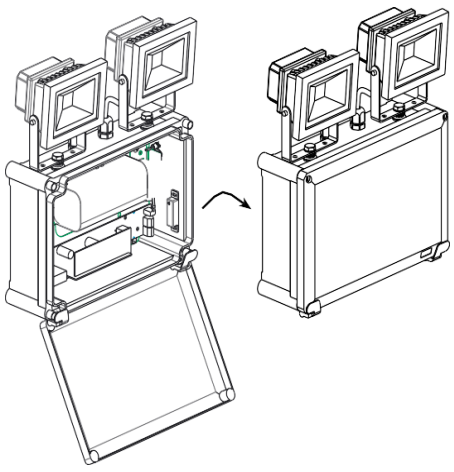
Supply voltage	230 – 240V a.c
IP Rating	IP65
Net Weight	2.6Kg

Installation



The Twin LED Spotlight can be fixed to the wall either directly or using the lugs provided.

1. Fix the box to the wall either directly through the 4 channels in the box or using the lugs. Use 8 to 12 gauge screws (not supplied).
2. Open the box and drill a Ø 20mm hole in the desired cable entry location, taking care to avoid damaging internal components.
3. Install the supplied cable gland in the Ø 20mm hole. This is necessary to maintain the IP rating.
4. Fit the power cable through the gland and terminate into the terminal block. Use Ø10mm circular cable to maintain the IP rating.
5. Close the Twin spotlight cover and lock into position.




Note: For DALI models, connect the DALI cable to the DALI terminals. If the DALI cable is separate from the power cable, an additional cable gland will be required.
